

Union Hill Elementary School
Homework Philosophy

We believe...

- the purpose of homework is to reinforce, practice, and review skills and knowledge taught in the classroom and to develop study and work habits
- that effective homework is engaging, individualized, and designed to ensure success for the student
- the amount of homework given each night should depend on the grade level and ability of the child. Homework should not take longer than 10 minutes **times a student's grade level. Ex: 30 minutes in 3rd grade, 50 minutes in 5th grade**
- that providing feedback on homework assignments is important to ensure students are learning and successful
- that homework should encourage and promote family time and provide opportunities for parents **to be involved in their child's education**
